TRAINING / COURSES

React Course - 2024
Udemy

Javascript Course - 2023
Udemy

PROJECTS

To Do List

To-Do List Application Using React and JavaScript
Technical Implementation:-

- **React Components**: The application is built using functional components, which are modular and reusable. Components such as TaskList, TaskItem, and TaskForm help in organizing the code and managing the state effectively.
- **State Management**: React's useState hook is used to manage the state of the tasks, allowing for dynamic updates and re-rendering of the UI based on user interactions.

Internet Banking

Internet Banking Interface Using JavaScript
Technical Implementation:-

- **Form Validation**: Ensuring that all user inputs are correctly formatted and meet the required criteria before submission.
- **Event Handling**: JavaScript handles various user events, such as button clicks, form submissions, and input changes. Event listeners are attached to elements to trigger specific functions, ensuring a responsive and interactive user experience.

TECHNICAL SKILLS

Programming Languages: JavaScript

Libraries: React

Tools : Visual Studio,Microsoft Excel
